

ELUEM DAVID CHINONSO

Software Developer | Flutter Developer | Backend Developer

Email: eluemdave@gmail.com

GitHub: <https://github.com/Davel240>

PROFILE

A passionate software engineering student with experience building software applications across mobile, web, and backend technologies. Skilled in Flutter development, Python backend development, Java application development, and database integration. I enjoy solving real-world problems through technology and continuously improving my programming skills through personal projects and competitions.

Currently focused on building practical applications, improving software design skills, and gaining industry experience through internships and collaborative projects.

EDUCATION

Veritas University, Abuja

Bachelor of Science in Software Engineering

Relevant Coursework:

- Software Engineering
 - User Experience Design
 - Database Systems
 - Programming Fundamentals
 - Web Development
 - Mobile Application Development
-

TECHNICAL SKILLS

Programming Languages

- Python

- Java
- Dart
- JavaScript
- HTML
- CSS

Frameworks & Technologies

- Flutter
- Flask
- Spring Boot
- LibGDX
- Firebase
- REST APIs

Databases

- MySQL
- Firebase Firestore

Tools

- Git & GitHub
- VS Code
- Android Studio
- Figma (Basic UX Design)

PROJECTS

ShopWise — Smart Shopping Optimization Application

Technologies: Flutter, Python, Firebase, Search Algorithms

A shopping assistant application designed to help users maximize their purchases within a given budget. The system uses optimization logic and search algorithms to recommend suitable combinations of items based on user requirements.

Key Features:

- Budget-based shopping recommendations
- Shopping list management
- User authentication
- Data storage using Firebase

GitHub:

<https://github.com/Davel240/shopwise>

Update — Global News Application

Technologies: Flutter, REST API

A mobile news application that provides users with recent news updates from over 24 countries. The application integrates external news services to display current headlines and information from different regions.

Key Features:

- Multi-country news support
- Real-time news updates
- Clean mobile user interface

GitHub:

<https://github.com/Davel240/update-news-app>

Attendance Management System

Technologies: Java, Spring Boot, Database Integration

A backend-based attendance management system designed to manage attendance records digitally. The application demonstrates backend development concepts, database handling, and structured application design.

GitHub:

<https://github.com/Davel240/attendance-system>

Whack-A-Mole Game

Technologies: Java, LibGDX

A 2D interactive game developed using the LibGDX framework. The project focuses on game development concepts including animations, user interaction, scoring systems, and asset management.

GitHub:

<https://github.com/Davel240/whack-a-mole>

COMPETITIONS & EXPERIENCE

Huawei ICT Competition Participant

Participated in the Huawei ICT Competition, representing my school and gaining practical exposure to modern ICT technologies and industry-related problem solving.

The competition strengthened my understanding of networking, ICT solutions, and professional technology environments.

ADDITIONAL LEARNING

Currently expanding knowledge in:

- Cloud technologies
 - Database management
 - Software architecture
 - openGauss database technology
 - Mobile and web application deployment
-

PERSONAL QUALITIES

- Strong problem-solving ability

- Willingness to learn new technologies
- Ability to work independently and collaboratively
- Passion for software development and innovation
- Adaptable and committed to continuous improvement
